CURRENT PROJECTS:

1. **Sardi A** Hyperthermic Intraoperative Intraperitoneal Chemotherapy for Intraabdominally Advanced Colorectal, Appendix, gastric, small bowel, primary peritoneal, Ovarian Cancers, Peritoneal Mesothelioma and Sarcomas. 1994 to present
2. **Sardi A.** Multi-center Selective Lymphadenectomy for Melanoma Trial II: A Phase III Multi-center Randomized Trial of Sentinel Lymphadenectomy and Complete Lymph Node Dissection versus Sentinel Lymphadenectomy Alone in Cutaneous Melanoma Patients with Molecular or Histopathological Evidence of Metastases in the Sentinel Node. 2006-present
3. **Sardi A.** International PMP Registry 2010. A world-wide, multi-institutional retrospective database creating the largest available dataset for a comparative study of conventional treatment versus radical cytoreduction with IP therapy for mucinous appendiceal cancer. This international registry is used for univariate and multivariate analysis of factors associated with survival. 2010 to present
4. **Sardi A.** A Study of Tissue Molecular Markers and Their Relationship to Treatment and Outcome in Appendiceal Cancer with Pseudomyxoma Peritonei (PMP). 2010 to present
5. **Sardi A.**, Diaz-Montes TM. A phase II randomized study: Outcomes after cytoreductive surgery (CRS) with or without carboplatin hyperthermic intraperitoneal chemotherapy (HIPEC) followed by adjuvant chemotherapy as initial treatment of advanced stage (stage III/IV) ovarian, fallopian tube, and primary peritoneal cancer. 2014 to present
6. **Sardi A.** Clinical Trial to Define the Effect of perioperative *H. Pylori* eradication with antibiotic treatment on the long term outcomes of patients with Pseudomyxoma Peritonei of appendiceal origin undergoing Cytoreductive Surgery with Hyperthermic Intraperitoneal Chemotherapy (CRS/HIPEC). A phase II, open label, historical controlled study to determine the impact of antibiotic therapy on the disease progression and overall survival of the patients with Pseudomyxoma Peritonei (PMP). 2014 to present
7. **Sardi A.**, Knight, Rob. A cohort study of the gastrointestinal microbiome in appendiceal cancer with peritoneal spread. A case control, cohort study to determine whether the gut microbiome of participants with appendiceal tumors with peritoneal spread differs from a healthy, age-matched cohort. 2105-present
8. **Sardi A.**, Bijelic, L. Identification of genomic alterations in diffuse malignant peritoneal mesothelioma. A retrospective observational cross-sectional study to characterize and describe the genomic profile of malignant peritoneal mesothelioma. 2016-present
